1	Summary Program Information for Lewis River/Speelyai Hatcheries - Spring Chinook
2	Compliance with Performance Measures: Lewis River/Speelyai Hatcheries - Spring Chinook
3	Remedial Actions Required at Lewis River/Speelyai Hatcheries - Spring Chinook
4	Adult Contribution to Fisheries, Spawning Grounds and Hatcheries: Lewis River/Speelyai Hatcheries - Spring Chinook

5 Annual Operating Expenses: Lewis River/Speelyai Hatcheries - Spring Chinook

6 Annual Operating Expenses - Lewis River/Speelyai Hatcheries

Executive Summary

This report presents the findings of the independent audit of the Lewis River/Speelyai Hatcheries - Spring Chinook program. The hatchery is located adjacent to the Lewis River, 3 miles downstream from Merwin Dam, about 8 miles east of Woodland, Washington. Speelyai hatchery is operated as a satellite facility to the Lewis River Hatchery. It is located in a mountainous area at the upper end of Lake Merwin on the Lewis River, approximately 21 miles east of Woodland. The hatchery is used for adult collection, incubation, and rearing of spring chinook, early coho (Type S), and late coho (Type N).

The audit was conducted in 1996-1997 as part of a 2-year effort that will include 67 hatcheries and satellite facilities located on the Columbia and Snake River system in Idaho, Oregon, and Washington. The hatchery operating agencies include the U.S Fish and Wildlife Service, Idaho Department of Fish and Game, Oregon Department of Fish and Wildlife, and Washington Department of Fish and Wildlife.

Background

The audit is being conducted as a requirement of the Northwest Power Planning Council (NPPC) Strategy for Salmon and the Columbia River Basin Fish and Wildlife Program. Under the audit, the hatcheries are evaluated against policies and related performance measures developed by the Integrated Hatchery Operations Team (IHOT). IHOT is a multi-agency group established by the NPPC to direct the development of new basinwide standards for managing and operating fish hatcheries. The Bonneville Power Administration (BPA) contracted with Montgomery Watson to act as an independent contractor for the audit.

IHOT has established five basic policies that cover: (1) hatchery coordination, (2) hatchery performance standards, (3) fish health, (4) ecological interaction, and (5) genetics. The audit focuses on all these policies, with the exception of hatchery coordination. These policies are set forth in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries (IHOT 1995)*. That document is the source for the performance measures that are the basis of this audit.

The Audit Process

The audit was based on the facility management's response to a 109-page questionnaire. This audit form was completed through a five-step process in which:

- Information was obtained from headquarters.
- The hatchery manager was asked to fill out and return the audit form.
- A 1-2 day site audit visit was conducted to inspect facilities, review hatchery records, discuss audit form responses, and develop remedial action plans.
- A compliance report was developed to document the compliance status of each performance measure. This report was then shared with the hatchery manager and IHOT representative.
- This hatchery evaluation report was written to document compliance with IHOT performance measures and develop cost estimates for remedial actions when needed.

Lewis River/Speelyai Hatcheries - Spring Chinook Results

The Lewis River facility includes 12 concrete raceways, 2 rearing ponds, and incubation facilities. The Speelyai facility includes 1 adult holding pond, 12 concrete raceways, and 1

rearing pond. Lewis River and Speelyai hatcheries were originally constructed to provide mitigation for hydroelectric system development in the Lewis River System. An almost total remodel at Lewis River Hatchery was funded with state enhancement funds in 1979 and 1980. The goal of the hatchery is to produce adult coho and spring chinook that will contribute to NE Pacific and Columbia River Basin sport and commercial fisheries.

The Lewis River/Speelyai Hatcheries - Spring Chinook program was in general compliance with most of the performance measures. In the area of program objectives, the hatchery was not meeting its adult return goal. The audit found that the hatchery was not in compliance with the screen approach and screen mesh criteria, temperature criteria, water quality monitoring requirements, and pathology-free water criteria, which are all facilities requirements. The hatchery was not meeting the flow criteria for incubation or the loading criteria for rearing ponds at Lewis River Hatchery. The hatchery needed to develop specific incubation and rearing standards for the IHOT Operations Plan, smoltification goal, and smoltification monitoring plan. The hatchery was not meeting all the alarm, food storage/quality control, transportation facilities, and sanitation requirements. The hatchery did not have a Genetics Monitoring and Evaluation Program.

The specific areas in which the Lewis River/Speelyai Hatcheries - Spring Chinook program requires remedial actions based on the IHOT performance measures are listed below. These remedial actions are listed in alphabetical order without intent of ranking or otherwise assigning priority:

- Check flow alarms daily
- Chill 300 gpm for incubation by 5°F
- Conduct IHOT QA/QC tests for feed preparation
- Develop approved genetics M&E plan
- Develop smoltification goal and monitor

- Develop specific incubation and rearing standards for the IHOT Operations Plan
- Follow IHOT incubation flow criteria or revise
- Follow IHOT protocols for disinfection of interiors and exteriors of transport vehicle
- Install security alarms at Lewis River and Speelyai Hatcheries
- Purchase telephone pagers for 8 staff
- Reduce program at Lewis River Hatchery or revise piping system to provide more water to the rearing ponds
- Replace screens at Speelyai Hatchery
- Run analysis for water quality parameters, turbidity, alkalinity, hardness, nitrite, and contaminants
- Sanitize equipment and rain gear utilized in broodstock handling or spawning prior to its use elsewhere in the hatchery
- Sanitize rearing vessels after fish are removed and prior to introducing a new fish lot or stock

Non-compliance issues resulting from items beyond human control or Performance Measures not relevant to this hatchery (Type 1 in Table 3, Section 4 of this report) were not listed above.

Facility Description

Name: Lewis River and Speelyai Hatcheries

Stock/Species: Spring Chinook

Coho (Type N)

Coho (Type S)

Operating Agency: Washington Department of Fish and Wildlife

Funding Agency: PacifiCorp

NMFS (Mitchell Act)

Location: The hatchery is located adjacent to the Lewis River, 3 miles downstream from Merwin Dam, about 8 miles east of Woodland, Washington. Speelyai hatchery is operated as a satellite facility to the Lewis River Hatchery. It is located in a mountainous area at the upper end of Lake Merwin on the Lewis River, approximately 21 miles east of Woodland.

Address: 4404 Lewis River Road

Woodland, WA 98674

Hatchery Manager: Mr. Robin Nicolay

Phone: (360) 225-2120

Fax: (360) 225-6330

Purpose: Lewis River and Speelyai hatcheries were originally constructed to provide mitigation for hydroelectric system development in the Lewis River System. An almost total remodel at Lewis River Hatchery was

funded with state enhancement funds in 1979 and 1980. The goal of the hatchery is to produce adult coho and spring chinook that will contribute to NE Pacific and Columbia River Basin sport and commercial fisheries.

Production Goal:

Lewis River Hatchery Production

Spring Chinook

Produce 900,000 yearlings for on-station release

Coho (Type N)

Produce 2,100,000 yearlings for on-station release

Provide 50,000 eggs to co-op programs

Provide eggs and fish to other facilities

Coho (Type S)

Produce 1,400,000 yearlings for on-station release

Produce 1,000,000 yearlings for upriver release

Produce 870,000 yearlings (from Speelyai Hatchery) for on-station release

Provide 14,000 eggs to co-op programs

Provide eggs and fish to other facilities

Speelyai Hatchery Production

Spring Chinook

Rear 315,000 spring chinook yearlings for transfer to Lewis River Hatchery

Coho (Type S)

Produce 200,000 yearlings for release into Lake Merwin

Provide 31,000 eggs/fish to co-op programs

Water Supply:

Lewis River Hatchery water rights total 38,613 gpm from three

sources: the Lewis River, an unnamed stream, and Colvin Creek.

Speelyai Hatchery water rights total 6,732 gpm from Speelyai Creek.

Facilities (Lewis River

Hatchery:

Adult Holding:	None
Incubation:	80 10-tray vertical stack incubators (800 trays)
Early Rearing:	5 deep troughs
Raceways:	12 concrete raceways - 4,000 cf each
Rearing Ponds:	2 concrete ponds - 90,000 cf and 80,000 cf

Facilities (Speelyai

Hatchery):

Adult Holding:	1 asphalt adult holding pond - 18,000 cf
Incubation:	50 10-tray vertical stack incubators (500 trays)
Early Rearing:	1 deep trough
Raceways:	12 concrete raceways - 7,200 cf each
Rearing Ponds:	1 asphalt rearing pond - 18,000 cf

Compliance Status

The hatchery audits are based on compliance with written IHOT performance measures. These performance measures are documented in *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries* (referred to as *IHOT 1995* in this report).

The purpose of the performance measures is to implement new basinwide policies that provide regional guidelines for operating anadromous hatcheries in the Columbia Basin.

The audit focuses on performance measures for IHOT policies that cover (1) hatchery performance standards, (2) fish health, (3) ecological interaction, and (4) genetics. These performance measures are intended to guide hatchery operations once production is established. For that reason, the hatchery operations audit included broodstock collection, spawning, incubation of eggs, fish rearing and feeding, fish release, equipment maintenance and operations, and personnel training. Production priorities are beyond the scope of this audit.

Based on *IHOT 1995*, a detailed 109-page audit form was developed. The audit form divided the performance measures into six major sections along major program and technical criteria areas. Two additional sections (sections 1 and 8) include general information and expenditure information needed for this Hatchery Evaluation Report and blank forms for additional comments. The following is the basic structure of the IHOT audit form:

- Section 1 Performance Measures for General Information and Expenditure
Information (PMs General 1-2)
- Section 2 Performance Measures for Program Objectives (PMs 1-4)

Integrated Hatchery Operations Team (IHOT) 1995. *Policies and Procedures for Columbia Basin Anadromous Salmonid Hatcheries*, Bonneville Power Administration, Portland, Oregon.

Section 3	Performance Measures for Facility Requirements (PMs 5-15)
Section 4	Performance Measures for Hatchery Practices (PMs 16-25)
Section 5	Performance Measures for Fish Health Policy (PMs 26-34)
Section 6	Performance Measures for Ecological Interactions (PMs 35-38)
Section 7	Performance Measures for Genetics Policy (PMs 39-43)
Section 8	Blank Forms for Additional Comments.

Several performance measures are repeated in various sections of the audit form. These performance measures overlap in *IHOT 1995* and were retained to allow individuals interested in specific portions of the audit (such as Genetics or Fish Health) to determine the compliance status of all performance measures for a given topic in one location. A repeated performance measure is indicated by shaded text.

The Hatchery Audit Process

The hatchery audit will be conducted over a 2-year period that concludes in 1997. At each hatchery, a five-step process was used to complete the overall hatchery audit. This process consisted of research and onsite visits. The site visit at the Lewis River/Speelyai Hatcheries was conducted on March 10, 1997.

The following is the five-step audit process:

1. Information was obtained from headquarters.
2. The hatchery manager was asked to fill out and return the **Audit Form**.
3. A 1-2 day site audit visit was conducted at each hatchery. During that visit an audit team inspected facilities, reviewed hatchery records, discussed audit form responses, and developed remedial action plans when appropriate.

4. During the site visit, the compliance status of each performance measure was discussed with the hatchery manager and IHOT representative. A portion of the Hatchery Evaluation Report was sent to the hatchery manager following the audit visit as a **Compliance Report**. That Compliance Report is Table 2 of this report.
5. Information from steps 1-4 was used to prepare a draft **Hatchery Evaluation Report**. This draft report was submitted to the operating agencies for review of the information used to determine compliance. Based on review and comments, a final Hatchery Evaluation Report was developed. The final report documents the compliance of a particular hatchery with the IHOT performance measures and presents cost estimates to correct any deficiencies.

Compliance Status of Lewis River/Speelyai Hatcheries - Spring Chinook

The following table includes information on life-stages that are held on this facility for some portion of their rearing cycle (Table 1). For multi-facility programs, summary cost and contribution data is presented at the facility where rearing occurs. For the compliance status relating to performance measures that do not occur at this hatchery, please refer to the Hatchery Evaluation Reports for the hatcheries and stocks listed in Table 1. A check mark (✓) indicates that the specific life-stage is held at this facility.

This section documents the compliance status of the Lewis River/Speelyai Hatcheries - Spring Chinook program. Each performance measure is presented in a table taken from the audit form (Table 2). The compliance status is identified by the following categories:

- **N/A** (not applicable)
- **Yes** (in compliance)
- **?** (unknown; generally due to unavailability of information to determine compliance)
- **No** (not in compliance).

Remedial actions are suggested for performance measures not in compliance. These remedial actions are grouped into categories and listed in Section 4 of this report, where the cost of the required remedial actions is also presented.

Table 1 Summary Program Information for Lewis River/Speelyai Hatcheries - Spring Chinook

Component	Location of Adult Holding, Spawning, Incubation, and Rearing					
	Merwin Dam/Lewis River Hatchery	Speelyai Hatcheries	Lewis River Hatchery			
Adult Collection	4					
Adult Holding		4				
Spawning		4				
Fertilization		4				
Incubation						
green-to-eyed		4				
eyed-to-hatch		4				
Rearing						
fry		4				
fingerlings			4			
smolts			4			
Acclimation/release			4			

Table 2 Lewis River/Speelyai Hatcheries - Spring Chinook Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#1	Are the hatchery programs outlined in a subbasin management plan?		4			Columbia Basin System Planning Production Plan and FERC Agreement 953-000	
#2	Is the hatchery operating under a current hatchery operational plan? Is it understood by staff? Is it being followed?		4 4 4			IHOT Operations Plan	
#3	Is a hatchery monitoring and evaluation plan in place? Do you have a written monitoring and evaluation plan?		4				
#4a	Adult contribution to fisheries, spawning grounds, and hatchery		4			Review of records	
#4b	Adult pre-spawning survival as compared with established goal		4			Review of records; in compliance 3 out of last 3 years	
#4c	Egg-take as compared with established hatchery goal		4			Review of records; in compliance 3 out of last 3 years	

Table 2 Lewis River/Speelyai Hatcheries - Spring Chinook Compliance With Performance Measures

		N/A	Yes	?	No		
#4d	Green-egg to eyed-egg survival as compared with established goal		4			Review of records; in compliance 3 out of last 3 years	
#4e	Eyed-egg to fry survival as compared with established goal		4			Review of records; in compliance 3 out of last 3 years	
#4f	Fry to smolt survival as compared with established goal		4			Review of records; in compliance 3 out of last 3 years	
#4g	Production as compared with established goal		4			Review of records; in compliance 3 out of last 3 years	
#4h	Percent survival (smolt to adult) as compared with established goal				4	Review of records; in compliance 0 out of last 2 years	Improve adult returns
#4i	Number of eggs, fry, fingerlings, smolts, and/or adults to meet basinwide needs	4				Review of records/Discussion	

Table 2 Lewis River/Speelyai Hatcheries - Spring Chinook Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#5a	Temperature						
	Does your water temperature meet the criteria for spawning?				4	To meet criteria need to: Chill 1,200 gpm by 6°F (Speelyai)	None
	Does your water temperature meet the criteria for incubation?				4	Review of records/Discussion	Chill 300 gpm by 5°F (Speelyai)
	Does your water temperature meet the criteria for rearing?				4	To meet criteria need to: Heat 7,500 gpm by 6°F (Lewis River) Chill 2,500 gpm by 7°F (Lewis River) Heat 2,000 gpm by 5°F (Speelyai) Chill 7,500 gpm by 4°F (Speelyai)	None
#5b	Dissolved gases						
	Is the oxygen level near saturation?		4			Review of records/Discussion	
	Is the dissolved nitrogen level less than saturation?		4			Review of records/Discussion	
#5c	Chemistry						
	Ammonia (un-ionized)			4		No data	Run analysis

		N/A	Yes	?	No		
#10	Screening facilities						
	Do you meet the approach velocity criteria?			4		Inspection of facilities/Discussion	Replace screens at Speelyai Hatchery (9,200 gpm)
	Are the fish screens regularly cleaned?				4	Inspection of facilities/Discussion	See above
	Does the screen mesh meet screen opening criteria?				4	Inspection of facilities/Discussion	See above
	Are rearing containers double screened for fish that should not be released to adjacent water?	4				Release on-station	
#11	Predator control facilities						
	Are your predation control facilities effective?		4			Inspection of facilities/Discussion	

Table 2 Lewis River/Speelyai Hatcheries - Spring Chinook Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#12	Food storage facilities and quality control						
	Does the storage of dry/semi-moist/moist foods (dry<12%; semi-moist 12-20%; moist >20% moisture) follow food manufacturer's recommendations?		4			Inspection of facilities/Discussion	
	Does a regional quality control officer oversee production procedures and monitor:						
	Verification by feed manufacturer that ingredients meet specifications?				4	Discussion	Conduct IHOT QA/QC tests for feed preparation
	Ensure feed does not contain unwanted drugs or other additives?				4	Discussion	See above
	Analyze ingredients contained in the final food product to ensure that feed specifications have been met?				4	Discussion	See above
	Are the foods stored and handled according to the following criteria?						

Table 2 Lewis River/Speelyai Hatcheries - Spring Chinook Compliance With Performance Measures

		N/A	Yes	?	No		
	Moist pellets should not exceed 10°F at point of delivery.		4			Discussion	
	Moist pellets should be removed from freezer just prior to feeding.		4			Discussion	
	Do not leave buckets of feed or feed containers outside exposed to light or heat.		4			Discussion	
	Open bags of feed should be fed within 1 to 2 days except when feeding small groups of fish.		4			Discussion	
	Automatic feeder hoppers and bulk storage facilities should be insulated against excessive temperatures (80°F and above).	4				None in use

		N/A	Yes	?	No		
#23 (cont)	Transportation facilities						
	Does the fish transport unit receive an inspection prior to loading?		4			Discussion	
	Does a pre-loading inspection covering tank water level, pumps or aerators, oxygen injection system settings, displacement gauge, and truck loading/hauling density tables checked and reviewed occur prior to loading fish in the transport unit?		4			Discussion	
	Do hauling criteria include checking the fish 45 minutes to 1 hour after loading?		4			Discussion	
	When fish are active and systems are functioning properly, is the oxygen concentration reduced and maintained at approximately 8 ppm?		4			Discussion	
	Is water temperature in the transportation unit maintained within the 42-48 °F range?		4			Discussion	

Table 2 Lewis River/Speelyai Hatcheries - Spring Chinook Compliance With Performance Measures

		N/A	Yes	?	No		
	Do fish releasing procedures include the following criteria?						
	Releasing the fish at the correct release site or into the correct water body.		4			Discussion	
	Tempering or the difference between the liberation tank and the target water body should not exceed 10°F.		4			Discussion	
	The liberation hose should be angled so that fish gently hit the water. Using a tripod is a method of ensuring the hose will stay at the proper angle.		4			Discussion	

Table 2 Lewis River/Speelyai Hatcheries - Spring Chinook Compliance With Performance Measures

PM #	Description of Performance Measure	Compliance Status				Basis for Compliance or Non-Compliance	Remedial Action Needed for Compliance
		N/A	Yes	?	No		
#24	Evaluation practices						
	Has the hatchery conducted fishery contribution studies to:						
	Determine the requirements for evaluating and improving management programs?		4			Discussion	
	Develop guidelines that define the geographical area and identify component stocks (hatchery and/or wild) that comprise the management unit?		4			Discussion	
	Develop guidelines that define if the proper stocks of fish are currently being used?		4			Discussion	
	Determine which management units contribute to a specific fishery and the time periods of those contributions?		4			Discussion	
	Determine the relative contributions of the various management units to a specific fishery over the different time periods?		4			Discussion

		N/A	Yes	?	No		
#43	Is there a genetics monitoring and evaluation program in place?						
	Is a genetics monitoring and evaluation program available?				4	Manual provided; hatchery-specific plan not provided	Develop approved genetics M&E plan
	Does the plan address the following elements listed in IHOT:						
	Does the program have elements needed to meet evaluation goals 1-4?				4	Discussion	See above
	Has a qualified geneticist reviewed and endorsed the program (goal 5)?				4	Discussion	See above
	Will the program collect the data and maintain the records needed to evaluate compliance on an ongoing basis (goal 5)?				4	Discussion	See above
	Is the program understood and followed by staff?				4	Discussion	See above

Remedial Actions

Based on the compliance status for each performance measure, remedial actions were developed. The required remedial actions are organized into five categories. The types of categories range across a spectrum from those actions that are beyond human control, to those that require a change in agency policy or procedures, to those that involve a significant capital cost to put in place. The following are the five types of remedial actions identified under phase 1 of the audit:

The Five Types of Remedial Actions

Type	Description
1	Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery
2	Remedial actions requiring changes in agency policies or procedures
3	Remedial actions requiring changes in monitoring coverage or interval
4	Remedial actions requiring significant capital expenditures
5	Remedial actions that may require significant capital expenditures but are not clearly definable at this time

Remedial Actions at Lewis River/Speelyai Hatcheries - Spring Chinook

This section presents the corrective actions required to bring the Lewis River/Speelyai Hatcheries - Spring Chinook program into compliance with IHOT performance measures. The remedial actions suggested here are just that, suggestions developed by the Montgomery Watson Audit Team. For some non-compliance areas, other remedial actions could be proposed. The required remedial actions are cross-referenced to each IHOT performance measure that was not in compliance. Where appropriate, the costs associated with the remedial actions are also presented (Table 3).

The cost estimates presented in this section are based on professional experience from similar projects. In most cases, only a lump-sum figure is presented, and detailed take-off lists have not been prepared. The cost estimates are essentially order of magnitude estimates ($\pm 40\%$).

More importantly, the suggested remedial activities may also present several levels of action. Optional actions have been listed for several problems. These optional actions are desirable for either operational or safety considerations.

Table 3. Remedial Actions Required at Lewis River/Speelyai Hatcheries - Spring Chinook

Remedial Action Required	Cost	PMS ¹
Type 1 - Non-compliance issues resulting from items beyond human control or Performance Measures not relevant for this hatchery		
Improve adult returns	---	4h
Type 2 - Remedial actions requiring changes in agency policies or procedures		
Check flow alarms daily	---	6
Conduct IHOT QA/QC tests for feed preparation	---	12
Follow IHOT incubation flow criteria or revise	---	18
Develop specific incubation and rearing standards for the IHOT Operations Plan	---	18-19
Develop smoltification goal and monitor	---	22a1
Follow IHOT protocols for disinfection interiors and exteriors of transport vehicle	---	23
Sanitize equipment and rain gear utilized in broodstock handling or spawning prior to its use elsewhere in the hatchery	---	28
Sanitize rearing vessels after fish are removed and prior to introducing a new fish lot or stock	---	28
Develop approved genetics M&E plan	---	43
Type 3 - Remedial actions requiring changes in monitoring coverage or interval		
Run analysis for water quality parameters, turbidity, alkalinity, hardness, nitrite, and contaminants	---	5c-5g

Remedial Action Required	Cost	PMS ²
Type 4 - Remedial actions requiring significant capital expenditures		
Chill 300 gpm for incubation by 5°F	\$120,000	5a
Install security alarms at Lewis River and Speelyai Hatcheries	\$25,000	6
Purchase telephone pagers for 8 staff	\$5,000	6
Replace screens at Speelyai Hatchery	\$32,000	10
Reduce program at Lewis River Hatchery or revise piping system to provide more water to the rearing ponds	\$75,000	19
Type 5 - Remedial actions that may require significant capital expenditures but are not clearly definable at this time		
None	---	

Hatchery Contribution to Fisheries, Spawning Grounds, and Hatcheries

This section presents the audit findings for the Lewis River/Speelyai Hatcheries - Spring Chinook program contribution of adult fish to fisheries, local fisheries, spawning grounds, and hatcheries. Data is reported by broodyear. A broodyear refers to the adult contribution from the eggs produced from a single group of spawning adults. For some species, this may include fish caught as 2-, 3-, 4-, 5-, and 6-year old fish. Because of the return distribution and data processing delays, the complete adult contribution for a given broodyear may not be available until 4 to 5 years after the fish have been released from the hatchery.

**Table 4. Adult Contribution to Fisheries, Spawning Grounds, and Hatcheries:
Lewis River/Speelyai Hatcheries - Spring Chinook**

Year	Fisheries	Spawning Grounds¹	Hatchery¹	Total Combined Contribution	Smolt to Adult Survival (percent)
	(Broodyear)	(Broodyear)	(Broodyear)	(Broodyear)	

Data obtained from Missing Production Groups Annual Report or from the Regional Mark Information System database.

Total combined adult contribution; presented when it is not possible to subdivide the contribution into fisheries, spawning grounds, and hatchery contributions.

Annual Operating Expenditures

The level and detail of annual operating expenditures varies widely depending on hatchery, operating agency, and funding source. When provided, expenditures were presented in terms of personnel costs, operating costs (power, feed, supplies), capital costs, indirect costs charged to the federal government, third-party costs, and other costs. These cost components were summed to determine a total hatchery annual cost. Based on discussion with the hatchery manager, the percent of total hatchery costs allocated to a given program was estimated. The total hatchery costs and the percent of hatchery costs allocated to a given program were used to compute the cost of a given program. Table 5 shows the annual operating expenses for the Lewis River/Speelyai Hatcheries - Spring Chinook program. For programs that occur at more than one facility (as shown on Table 1 in Section 3 of this report), the cost breakdown for the component(s) at each facility is presented in separate tables (Table 5a).
